

Do you want to play a key role in a Research and Innovation mission to serve Sustainable Development and Animal Welfare? Do you want to join a dynamic and innovative organization serving Animal Nutrition and Health?

**Adisseo is looking for his:
Scientific team leader (f/m/d) R&I Health by Nutrition (R&I NUTSAT)**

Adisseo is one of the world leaders in the field of additives for animal feed. The group relies on its 10 research and technology centers (around 200 persons), and its production sites based in Europe, the United States and China to design, produce and market nutritional solutions for sustainable animal feed. It employs more than 2,185 people and, thanks to its global distribution network, serves more than 3,900 customers in around 100 countries.

We develop and support exciting new products and concepts for the animal nutrition and health industry. Our competence center (Center of Expertise and Research in Nutrition, 45 people), based in Commentry (France), brings together complementary expertises for Research and Innovation in Nutrition and Animal Health (monogastrics). Our work revolves around a scientific, creative, and international environment where your scientific experience in nutrition and / or animal health will be key for the development of new sustainable solutions for animal nutrition.

The position offers great opportunities for interactions between disciplines.

This position will allow you to work with a team of 6 scientists dedicated to developing and testing new solutions for monogastric health by nutrition.

The main responsibilities:

Research team manager:

- Manages the team of 6 direct reports, which includes team leadership and alignment, objective definition and evaluation, training and all other relevant topics related to team management.
- Develops his team
- Responsible for Research & Development programs:
- Defines the scientific vision in the field of health by nutrition
- Proposes research and development programs in order to develop new products and services, to develop knowledge in the field of health by nutrition, to provide scientific support to the Business Unit
- Is responsible for the definition and success of R&D projects for the Health by Nutrition team
- Ensures the scientific and technical excellence of the programs of the Health through nutrition team

Profile:

The main requirements for this position include solid experience in nutrition and / or animal health,

- Doctorate in nutrition and / or animal health or equivalent
- + 5 years of experience in growth performance within an R&D team and your experience in team management will make the difference (Pork / Poultry).
- team management, project and budget management will drive you
- Good communication and networking skills, team spirit and innovation
- Fluent English - French and / or Chinese would be a plus

Location: This position will be located in France (possibility in Lyon, Antony or Commentry).
